

Step 1: Create Apex Class

Go to:

Setup → Apex Classes → New

Paste this code:

Without and With Attachment

```
public class EmailService {

    public static void sendEmail() {

        // Create Email Object
        Messaging.SingleEmailMessage mail =
            new Messaging.SingleEmailMessage();

        // Recipient Email
        mail.setToAddresses(
            new String[] {'gharatkaustubh36@gmail.com'}
        );

        // Subject
        mail.setSubject(
            'Salesforce Email Notification'
        );

        // Body
        mail.setPlainTextBody(
            'Hello, this email is sent using Apex Email Service.'
        );

        // Send Email
        Messaging.sendEmail(
            new Messaging.SingleEmailMessage[] {mail}
        );

        System.debug('Email Sent Successfully');
    }

    public static void sendEmailWithAttachment() {

        Messaging.SingleEmailMessage mail =
            new Messaging.SingleEmailMessage();
```

```

// Recipient
mail.setToAddresses(
    new String[] {'gharatkaustubh36@gmail.com'}
);

// Subject
mail.setSubject(
    'Salesforce Email with Attachment'
);

// Body
mail.setPlainTextBody(
    'Please find attachment below.'
);

// Attachment
Messaging.EmailFileAttachment attachment =
    new Messaging.EmailFileAttachment();

attachment.setFileName('sample.txt');

attachment.setBody(
    Blob.valueOf('This is sample attachment content')
);

attachment.setContentType('text/plain');

// Attach File
mail.setFileAttachments(
    new Messaging.EmailFileAttachment[] {attachment}
);

// Send Email
Messaging.sendEmail(
    new Messaging.SingleEmailMessage[] {mail}
);

System.debug('Email Sent Successfully');
}
}

```

Replace:

yourmail@gmail.com

with your email.

Save class.

Step 2: Execute Program

Open:

Developer Console → Debug → Open Execute Anonymous Window

Run:

```
EmailService.sendEmail();
```

Click:

- Execute
-

Step 3: Check Email Inbox

Open Gmail/Outlook inbox.

Email aa jayega.
