

Step 1: Create Apex Class

Go to:

Setup → Apex Classes → New

Paste this code:

Without and With Attachment

```
public class EmailService {
```

```
    // Without Attachment
```

```
    public static void sendEmail(
```

```
        String toEmail,
```

```
        String subject,
```

```
        String bodyText
```

```
    ){
```

```
        Messaging.SingleEmailMessage mail =
```

```
            new Messaging.SingleEmailMessage();
```

```
        // Recipient
```

```
        mail.setToAddresses(
```

```
            new String[] {toEmail}
```

```
        );
```

```
// Subject

mail.setSubject(subject);

// Body

mail.setPlainTextBody(bodyText);

// Send

Messaging.sendEmail(

    new Messaging.SingleEmailMessage[] {mail}

);

System.debug('Email Sent Successfully');
}

// With Attachment

public static void sendEmailWithAttachment(

    String toEmail,

    String subject,

    String bodyText

){

    Messaging.SingleEmailMessage mail =

        new Messaging.SingleEmailMessage();
```

```
// Recipient

mail.setToAddresses(

    new String[] {toEmail}

);

// Subject

mail.setSubject(subject);

// Body

mail.setPlainTextBody(bodyText);

// Attachment

Messaging.EmailFileAttachment attachment =

    new Messaging.EmailFileAttachment();

attachment.setFileName('sample.txt');

attachment.setBody(

    Blob.valueOf(

        'This isssssssssss sample attachment content'

    )

);

attachment.setContentType('text/plain');
```

```
// Attach File

mail.setFileAttachments(

    new Messaging.EmailFileAttachment[] {attachment}

);

// Send

Messaging.sendEmail(

    new Messaging.SingleEmailMessage[] {mail}

);

System.debug('Email Sent Successfully');
}
}
```

Save class.

Step 2: Execute Program

Open:

Developer Console → Debug → Open Execute Anonymous Window

Run:

Without Attachment

```
EmailService.sendEmail(
```

```
'gharatkaustubh36@gmail.com',  
  
'Test Subject',  
  
'Hello from Salesforce Apex'  
);
```

With Attachment

```
EmailService.sendEmailWithAttachment(  
  
'gharatkaustubh36@gmail.com',  
  
'Attachment Mail',  
  
'This mail contains attachment'  
);
```

Step 3: Check Email Inbox

Open Gmail/Outlook inbox.

Email aa jayega.
